

Concrete Restoration Supervisor

Winnipeg, Manitoba

COMMERCIAL & INDUSTRIAL SERVICES LTD.

Our client, Carlson Commercial & Industrial Services Ltd., seeks a **Concrete Restoration Supervisor** for their Winnipeg, MB location. Reporting to the Division Manager, you will be an integral part of growing the Concrete Restoration Division. This position will appeal to progressive, self-motivated, driven individuals looking for the next step in their project management career in a rewarding dynamic environment with a leader in the industry.

The Project Supervisor is primarily responsible for overseeing the entire project to ensure safety, quality, profitability, and implementation of all necessary controls required for a successful and profitable project result.

Responsibilities:

- Support and foster Carlson's safety program/safety culture at all times.
- Coordinate tasks and allocate jobs according to project requirements - developing and managing site logistics plan.
- Ensure that all required documentation relating to safety, HR, QC, and daily job records are complete and accurate
- Monitor and ensure projects are executed on time and on budget.
- Communicate effectively with the Management Team to ensure efficient and productive operations.
- Be willing to learn and take on new types of work.
- Be available and respond to project needs and issues in a timely manner.
- Supervise team members and enable them to grow and succeed through effective feedback, instruction, and encouragement.
- Ensure complete customer satisfaction with all phases of projects through completion.
- Assist in producing schedules and monitor attendance of crew members.
- Provide hands-on involvement and support to crew members.
- Manage field resources, labor and related material

Qualifications:

- 5 years minimum verifiable commercial and Industrial experience in concrete restoration and waterproofing field is essential with demonstrated ability to run profitable projects and efficient teams
- Preference given to college degree in construction/ project management/engineering. Consideration given to the right candidate for a combination of continuing education, verifiable field experience and employment for a minimum of 5 years in the concrete restoration and waterproofing industry.
- Read and comprehend documents, project specification/manuals, understand and interpret construction plans as required and work in a team environment for the positions offered.
- Strategic thought processing, comprehension, and understanding for the position.
- Understand the application of all specialty materials required for the concrete restoration scope of work to be performed: coverage rates, yields, application procedures i.e.: concrete repair materials (bag goods and design mix) coatings: waterproofing, urethane, acrylic and cementitious coatings.
- Demonstrated ability to build productive business relationships
- A track record of solid judgment and decision-making skills
- Strong organizational and priority management skills
- Excellent communication skills and fluency in English is essential
- Excellent computer skills required with fluency in Microsoft Office: Word, Excel, Outlook

Compensation:

- Competitive Compensation Package DOQ
- Life Insurance, Disability Insurance, Health and Dental Benefits
- Training and development opportunities

*Canadian Citizenship and valid driver's license with clean abstract required.
